

Case Study

Project: Bentley Motors car showroom, Leicester
Size: 750 m²
Product: **weber.set rapid plus**, **weber.joint wide flex**
Client: Michael Powles Ltd
Applicator: Leicester Ceramics
Retailer: Parkside Tiles

Solution

It was imperative that the tiles were fixed with a top quality adhesive and grout. The specification of **weber.set rapid plus**, a rapid setting tile adhesive for low porosity tiles and substrates, was the ideal solution for the practical requirements of the floor as demanded by the showroom which will bear heavy cars. The application was finished with the **weber.joint wide flex**.

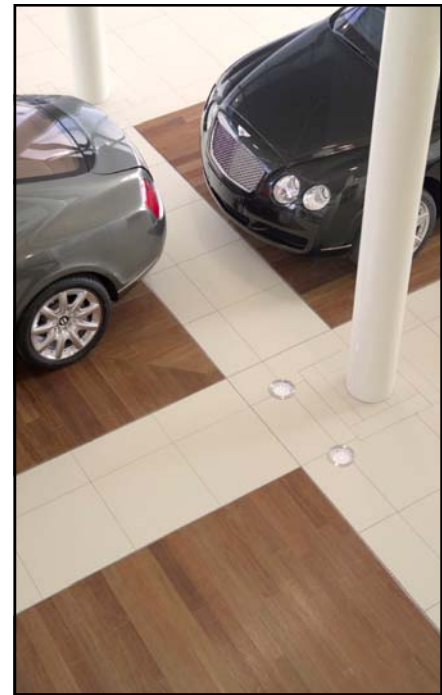

Dealer principle Tim Reed commented: "We've been very impressed with the installation of our new showroom floor. With such a high visibility showroom, allied to the brand that we're selling, it was imperative that the floor looked fantastic. Equally important was the potential long-term durability of both the tiles and the installation. Each Bentley weighs nearly three tons and we're constantly moving cars around within the showroom."

Project Brief

A new Michael Powles Ltd Bentley showroom in Leicester has received a first class floor tiling application thanks to the combined efforts of **Weber, Parkside Tiles and Leicester Ceramics**.

The showroom installation required the fixing of 750 square metres of Revigres rectified Micron Marfim floor tiles (supplied by Parkside Tiles) with **weber.set rapid plus** and **weber.joint wide flex**
